JOURNAL of ANALYTICAL and APPLIED PYROLYSIS

Subject Index

Air atmosphere
Kinetics of the thermal decomposition of polyurethane foams in nitrogen and air atmospheres, 69
Automobile shredder residue
Pyrolysis of automobile shredder residue: an analysis of the products of a commercial screw kiln process, 49

Bed depth
The influence of bed depth on secondary reactions during slow pyrolysis of coal, 83
Benzo(C_9H_{10})hydrocarbons
Benzoannelated valence isomers of homoannulenes. Part IV. Flow vacuum pyrolysis of 1,2,3,3a,8,8a-hexahydro-2,3,8-methenocyclopentindene, 151

Catalysis
Rare earth metal oxides: formation, characterization and catalytic activity. Thermoanalytical and applied pyrolysis review, 111
Chemotaxonomy
Characterisation of wood extractives by pyrolysis–gas chromatography/mass spectrometry of quaternary ammonium hydroxide extracts, 1
Chloroacetaldehyde
Mass and microwave spectroscopic studies of pyrolysis of chloroacetaldehyde and its methyl derivatives, 27
Cosmetics
A rapid simple pyrolysis derivatisation gas chromatography–mass spectrometry method for profiling of fatty acids in trace quantities of lipids, 185

Extractives
Characterisation of wood extractives by pyrolysis–gas chromatography/mass spectrometry of quaternary ammonium hydroxide extracts, 1

Fats
A rapid simple pyrolysis derivatisation gas chromatography–mass spectrometry method for profiling of fatty acids in trace quantities of lipids, 185
Flame resistance
Thermal degradation and combustion process of liquid crystalline polyesters studied by directly coupled thermal analysis–mass spectrometry, 173
Flow vacuum pyrolysis
Benzoannelated valence isomers of homoannulenes. Part IV. Flow vacuum pyrolysis of 1,2,3,3a,8,8a-hexahydro-2,3,8-methenocyclopentindene, 151

GC/FTIR
A methodological approach to *N,N*-dialkylamide thermal degradation at low temperatures, 33
GC/MS
A methodological approach to *N,N*-dialkylamide thermal degradation at low temperatures, 33

Humic acid
Characterization of soil humin by pyrolysis(/methylation)–gas chromatography/mass spectrometry: structural relationships with humic acids, 161
Humin
Characterization of soil humin by pyrolysis(/methylation)–gas chromatography/mass spectrometry: structural relationships with humic acids, 161

Jojoba oil
A rapid simple pyrolysis derivatisation gas chromatography–mass spectrometry method for profiling of fatty acids in trace quantities of lipids, 185

Kinetic equations
Kinetics of the thermal decomposition of polyurethane foams in nitrogen and air atmospheres, 69
Kinetics
Kinetic study of the thermogravimetric behavior of different rubbers, 95

Laccol
Characterization of *Rhus vernicifera* and *Rhus succedanea* lacquer films and their pyrolysis mechanisms studied using two-stage pyrolysis–gas chromatography/mass spectrometry, 199
Lacquer film
Characterization of *Rhus vernicifera* and *Rhus succedanea* lacquer films and their pyrolysis mechanisms studied using two-stage pyrolysis–gas chromatography/mass spectrometry, 199
Lanolin
A rapid simple pyrolysis derivatisation gas chromatography–mass spectrometry method for profiling of fatty acids in trace quantities of lipids, 185
Linseed oil
A rapid simple pyrolysis derivatisation gas chromatography–mass spectrometry method for profiling of fatty acids in trace quantities of lipids, 185
Lipstick bases
A rapid simple pyrolysis derivatisation gas chromatography–mass spectrometry method for profiling of fatty acids in trace quantities of lipids, 185
Liquid crystalline polyesters
Thermal degradation and combustion process of liquid crystalline polyesters studied by directly coupled thermal analysis–mass spectrometry, 173

Mass spectrometry
Characterisation of wood extractives by pyrolysis–gas chromatography/mass spectrometry of quaternary ammonium hydroxide extracts, 1
Mass and microwave spectroscopic studies of pyrolysis of chloroacetaldehyde and its methyl derivatives, 27
Methyl derivatives of chloroacetaldehyde
Mass and microwave spectroscopic studies of pyrolysis of chloroacetaldehyde and its methyl derivatives, 27
Microwave spectroscopy
Mass and microwave spectroscopic studies of pyrolysis of chloroacetaldehyde and its methyl derivatives, 27
Modelling
Contribution to the modelling of pre-depolymerisation of polystyrene, 15

N,N-dialkylamides
A methodological approach to *N,N*-dialkylamide thermal degradation at low temperatures, 33
Nitrogen atmosphere
Kinetics of the thermal decomposition of polyurethane foams in nitrogen and air atmospheres, 69
Nuclear fuel reprocessing
A methodological approach to *N,N*-dialkylamide thermal degradation at low temperatures, 33

Polystyrene
Contribution to the modelling of pre-depolymerisation of polystyrene, 15
Polyurethane foam
Kinetics of the thermal decomposition of polyurethane foams in nitrogen and air atmospheres, 69
Pre-depolymerisation
Contribution to the modelling of pre-depolymerisation of polystyrene, 15
Pyrolysis mechanism
Characterization of *Rhus vernicifera* and *Rhus succedanea* lacquer films and their pyrolysis mechanisms studied using two-stage pyrolysis–gas chromatography/mass spectrometry, 199
Mass and microwave spectroscopic studies of pyrolysis of chloroacetaldehyde and its methyl derivatives, 27
Pyrolysis temperature
The influence of bed depth on secondary reactions during slow pyrolysis of coal, 83
Pyrolysis/methylation
Characterization of soil humin by pyrolysis(/methylation)–gas chromatography/mass spectrometry: structural relationships with humic acids, 161
Pyrolysis–gas chromatography
Characterisation of wood extractives by pyrolysis–gas chromatography/mass spectrometry of quaternary ammonium hydroxide extracts, 1

Pyrolysis–gas chromatography/mass spectrometry
Characterization of soil humin by pyrolysis(/methylation)–gas chromatography/mass spectrometry: structural relationships with humic acids, 161
A rapid simple pyrolysis derivatisation gas chromatography–mass spectrometry method for profiling of fatty acids in trace quantities of lipids, 185
Characterization of *Rhus vernicifera* and *Rhus succedanea* lacquer films and their pyrolysis mechanisms studied using two-stage pyrolysis–gas chromatography/mass spectrometry, 199

Rare earth metal oxides
Rare earth metal oxides: formation, characterization and catalytic activity. Thermoanalysis and applied pyrolysis review, 111
Recycling
Contribution to the modelling of pre-depolymerisation of polystyrene, 15
Review
Rare earth metal oxides: formation, characterization and catalytic activity. Thermoanalysis and applied pyrolysis review, 111
Rubber
Kinetic study of the thermogravimetric behavior of different rubbers, 95

Screw kiln pyrolysis
Pyrolysis of automobile shredder residue: an analysis of the products of a commercial screw kiln process, 49
Secondary reactions
The influence of bed depth on secondary reactions during slow pyrolysis of coal, 83
Skin
A rapid simple pyrolysis derivatisation gas chromatography–mass spectrometry method for profiling of fatty acids in trace quantities of lipids, 185
Solvent extraction
A methodological approach to *N,N*-dialkylamide thermal degradation at low temperatures, 33

Tetramethylammonium hydroxide
A rapid simple pyrolysis derivatisation gas chromatography–mass spectrometry method for profiling of fatty acids in trace quantities of lipids, 185
Characterisation of wood extractives by pyrolysis–gas chromatography/mass spectrometry of quaternary ammonium hydroxide extracts, 1
Thermal analysis–mass spectrometry
Thermal degradation and combustion process of liquid crystalline polyesters studied by directly coupled thermal analysis–mass spectrometry, 173
Thermal decomposition
Kinetics of the thermal decomposition of polyurethane foams in nitrogen and air atmospheres, 69
Thermal degradation
A methodological approach to *N,N*-dialkylamide thermal degradation at low temperatures, 33
Contribution to the modelling of pre-depolymerisation of polystyrene, 15
thermal degradation and combustion process of liquid crystalline polyesters studied by directly coupled thermal analysis–mass spectrometry, 173
Thermal isomerization
Benzoannelated valence isomers of homoannulenes Part IV. Flow vacuum pyrolysis of 1,2,3,3a,8,8a-hexahydro-2,3,8-methenocyclopentindene, 151
Thermally assisted hydrolysis and methylation
Characterisation of wood extractives by pyrolysis–gas chromatography/mass spectrometry of quaternary ammonium hydroxide extracts, 1
Thermogravimetry
Kinetic study of the thermogravimetric behavior of different rubbers, 95

Urushiol
Characterization of *Rhus vernicifera* and *Rhus succedanea* lacquer films and their pyrolysis mechanisms studied using two-stage pyrolysis–gas chromatography/mass spectrometry, 199

Valence isomers of homoannulenes
Benzoannelated valence isomers of homoannulenes Part IV. Flow vacuum pyrolysis of 1,2,3,3a,8,8a-hexahydro-2,3,8-methenocyclopentindene, 151
Vegetable oils
A rapid simple pyrolysis derivatisation gas chromatography–mass spectrometry method for profiling of fatty acids in trace quantities of lipids, 185

Volatile yield
The influence of bed depth on secondary reactions during slow pyrolysis of coal, 83

Wood
Characterisation of wood extractives by pyrolysis–gas chromatography/mass spectrometry of quaternary ammonium hydroxide extracts, 1
